

ADVISOR Enterprise 9.4

New Features

20 Reasons for Upgrading to version 9.4 ...

- ✓ Separate operational requirements from training by transitioning tasks that require training into performance and enabling objectives.
- ✓ Facilitate the creation of Performance and Enabling Objectives through scalar diagrams and auto generate function.
- ✓ Consolidate knowledge/skills for job. To minimize duplication, knowledge/skills needed to perform tasks are automatically compiled in a single list.
- ✓ Provide new venue for tasks analysis. In addition to Difficulty, Importance and Frequency (DIF) model, Criterion model may also be used to determine need for training and prioritize tasks.
- ✓ Specify the level of each knowledge/skill gap and how they will be addressed.
- ✓ Facilitate work assignment. Analysis of each job (occupation) can be assigned to specific team member, who may share with others as needed.
- ✓ Streamline Training Needs Analysis Template creation. Users can include analysis in library accessible to others in a single click.
- ✓ Extend archive function to mission, job, task as well as knowledge/skill gap analysis.
- ✓ Forecast/Compare costs of media within same category (i.e., part task trainer versus full task trainer) as well as cost of same media under varied conditions.
- ✓ Generate Training Plans. Graphical user interface is provided to assign instructional goals to lessons as well as reorganize, rename, add and delete lessons.
- ✓ Facilitate identification/grouping of instructional goals that are similar through a new content type field and auto allocate function.
- ✓ Streamline Development Time estimates by merging development factors with feasibility and displaying factors that contribute to development effort.
- ✓ Facilitate multiple record editing. Provide spreadsheet like interface to edit, sort, add and delete multiple records – instructional goals, for example.
- ✓ Facilitate language modification. Modify the ADVISOR language in line with your or client's terminology by updating the Language files.
- ✓ Effectively communicate the results to clients and colleagues with nine new actionable reports.
- ✓ Facilitate data collection from team members. Set-up unlimited number of accounts with limited privileges to team members.
- ✓ Includes 41 Excel spreadsheets to facilitate data collection from subject matter experts and clients import in ADVISOR.
- ✓ Full support of Mozilla Firefox browser.
- ✓ Increase work space of various fields as well as storage.
- ✓ Report Gross Margins - i.e., contribution to business after paying upfront and recurring costs.
