

## News Release

For Immediate Release

### **Ocean Software and BNH Expert Software Announce Strategic Partnership to Revolutionise End-to-End Training Management**

Ocean Software, developers of the industry-leading FlightPRO training and operations management solution, and BNH Expert Software, creators of the cutting-edge ADVISOR Enterprise training needs analysis and design platform, are proud to announce the beginning of a strategic partnership. Together, the companies will deliver a comprehensive, integrated training management system that spans the entire training lifecycle, combining decades of expertise in training design, delivery, scheduling, and evaluation.

This collaboration aims to transform how defence forces globally manage their training programs by offering a seamless solution that links every phase of the training cycle. From identifying training needs and designing effective programs, to delivering and scheduling training and evaluating its impact. The partnership will provide customers with unparalleled efficiency and insight, sustaining the highest levels of operational readiness.

#### **A Fully Integrated Training Ecosystem**

Ocean Software's FlightPRO is a trusted solution for defence forces and aviation organisations worldwide, delivering tactical and strategic insights needed to optimise mission-critical operations and training. BNH's ADVISOR Enterprise complements this with its sophisticated training needs analysis and evaluation capabilities, enabling organisations to design effective and efficient training programs that precisely address skill gaps and operational requirements.

By integrating these solutions, customers will gain access to a powerful platform that not only enhances the quality of training but also ensures data-driven decision-making and real-time situational awareness at every stage. Key features of the integrated system will include:

- Define and validate training requirements with precision.
- Create highly effective and efficient training programs tailored to organisational objectives.
- Optimised scheduling, resource allocation, and operations.
- Leverage evaluation data to refine training programs, closing the loop in the training cycle.
- Compliance with the S6000T International Specification for training analysis and design.

## **Driving Efficiency and Excellence**

“This partnership is an exciting opportunity to bring together two best-in-class solutions to provide customers with a complete training management ecosystem,” said Pete Smith, CEO at Ocean Software. “By joining forces with BNH Expert Software, we’re addressing the need for a truly integrated solution that spans the entire training lifecycle and bringing together over 70 years of combined global experience to achieve this.”

“Together, we’re not just improving training programs, we’re helping organisations achieve operational excellence,” added Jay Bahlis, President at BNH Expert Software. “Our shared commitment to innovation and customer success makes this partnership a perfect match.”

## **A Game-Changer for Training Management**

The integrated solution is expected to benefit organisations across sectors including defence, aviation, and emergency services where effective training is mission critical. By delivering improved operational readiness, resource efficiency, and strategic alignment, the partnership between Ocean Software and BNH Expert Software promises to redefine the training management landscape.
